

SMX SeaView J1939 Digital Display Kit

for SmartCraft version 1.0 engines

Thank you for purchasing the SMX SeaView J1939 instrumentation kit for your Cummins Marine diesel engine. Installation of this instrumentation kit is very simple and straight forward. To begin, install the SMX engine interface harness on the engine's 40-pin vessel interface connection. Once installed, connect the variable length extension harness, and run this harness to the helm station. At the helm station, connect the SMX digital display harness and install the digital screen and key switch on the dashboard.
